## Overview

This document is intended for eSIS workstation administrators and details the hardware and software requirements for those workstations.

The document is divided into two sections. The first section details hardware requirements for eSIS users. These users access the Oracle Forms server. The second section details hardware requirements for Teacher Assistant users. These users access the Java application server.

Software versions listed represent the minimum requirement. Higher versions will be supported except where noted with (\*). In these cases only the specific version listed may be used. For specific software configurations please reference the eSIS support matrix document.

## eSIS Users

These are users of the core eSIS application. They are typically school secretaries, guidance counselors, principals, etc. These workstations will be connecting to the Oracle 10g Forms and Reports servers.
