MAC OS X NOTES

The experience of the MAC users that are working with eSIS has been that updating their machines to OS X has been a positive experience. The issues that were being experienced greatly diminished once the upgrade to OS X was complete. The java support that was received when working with OS X was very good in comparison to the other OS's.

Below is a list of specifications that you will need to consider if using the MAC OS X platform.

- MAC OS X 10.2.8 (10.2 can use Software Update to upgrade to 10.2.8)
- Java 1.4.1 (1.4 can use Software Update to upgrade to 1.4.1)
- Adobe Acrobat Reader 5.1 comes installed on MAC OS X machines.
- It's been noted that Netscape 7.0 and Safari will not work with eSIS on MAC OS X machines.

To complete the Software Updates for the OS 10.2.8 and Java 1.4.1 please follow the below steps.

- Click on the Apple Menu
- Select "System Preferences"
- Click "Software Update"
- Click "Check Now"
- Follow the on screen prompts (Checkmark the updates that you want, then click Install)
